

**THAT PART
OF THE
WORLD,
THAT PART
OF THE BUILDING
INDUSTRY.**

**THE BUILDING INDUSTRY
IS OUR WORLD.
NOT THE WHOLE INDUSTRY,
BUT THE PART THAT LOOKS BEYOND
PURCHASES AND WANTS
TO GO FORWARD. ALWAYS.**

This is why we don't like speaking about us and our history and prefer talking about our ideas, which are then turned into innovative and efficient solutions, into new opportunities.

This is the best way to illustrate the company's growth, which in few years led us to become a leading firm acclaimed by architects, designers and businesses in the field of structural restoration and energy savings.

**ALWAYS ABREAST WITH THE TIMES
OR ACTUALLY ONE STEP AHEAD.**

INNOVATION AS A CORPORATE DEVELOPMENT PRINCIPLE

Innovation is in our blood and we have expanded by strengthening it over time.

Our corporate logic leads us to constantly seek new opportunities to improve buildings, thereby making them more durable, resistant, healthier, safer and more environmentally-friendly. This is our view of innovation: applying technological development directly on the field and making it simple, tangible, effective and definitely useful.

**TECHNOLOGY SHOWS
ITS INNOVATIVE FORCE IN ACTUAL
APPLICATIONS.**

SOLUTIONS THAT GO BEYOND THE PROBLEM

Let's start from an assumption: no problem is impossible to solve.

This is what drives us to identify increasingly performing solutions, to seek technology that can provide simple and effective results, to go beyond the problem itself.

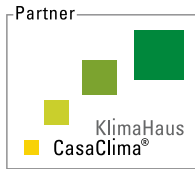

This is how every day

we face issues related to energy savings, the production of concrete works, structural consolidation and dehumidification with an highly innovative approach.

**FOR EVERY PROBLEM
THERE'S AN INNOVATIVE SOLUTION.**

ECO-COMPATIBLE DECISIONS FOR SUSTAINABLE BUILDING

We must necessarily consider the environment we live and operate in.

The natural setting around the building industry requires respect and protection.

This is why the only solutions we regard as valid options are the ones that can ensure a low-environmental impact, high eco-compatibility and an environmentally-sustainable approach.

Our adhesion to CasaClima was the direct consequence of an approach that places us among the champions of Green Building. Something we firmly believe in.

**SUSTAINABILITY
IS A STRAIGHT CHOICE
TO PROTECT EVERYONE'S FUTURE.**

THE BEST EXPERTISE CURRENTLY AVAILABLE IN THE CONSTRUCTION INDUSTRY

Our business stems from our expertise.

Our technical competence, experience in the field and technological know-how guide our every step and adds value to it.

Whether it's a matter of defining a new product, conducting work or planning new research, we deploy all our excellence and **expertise**. We give our all because the added value for which we stand out is something we cannot forgo.

**THE KNOW-HOW WE HAVE ACQUIRED
IS SHOWN BY THE EFFECTIVENESS
OF THE SOLUTIONS OFFERED.**

AN INTERNATIONAL APPROACH FOR INFINITE HORIZONS

The world is our oyster.

Because this is where we are heading for with our international experiences, our business abroad and with our cosmopolitan products.

Recently-established Tecnova International is only the formal side of a globalisation that permeates our business, starting from our products, which have an international vocation, up to our worldwide applications.

**A GLOBAL APPROACH
IS KEY FOR
LOCAL ACTION**

HELPING PEOPLE DEVELOP TO IMPROVE THE WORLD

Our focus is always on people.

When we work on a construction project, which will be used, occupied, admired or simply used, we think of people. The satisfaction of the end user, as that of the client – whether this is a private individual, a designer or a company – is the true measure of our success.

Indeed, we are committed to focusing on training and knowledge, because we believe that investing in people and giving them the opportunity to develop is one of our duties. Starting from our in-house staff.

**SPREADING EXPERTISE
MEANS BUILDING
A FUTURE WITH A CLOSE EYE ON
QUALITY.**

ACROSS THE WORLD, FACTS **ILLUSTRATE** OUR SUCCESS

Our products are opening up to the world.

Having innovative products means operating wherever there is the need to have a successful solution.

This is why our case histories are associated with a wide variety of circumstances and sites.

First of all in Italy, where we are based, but also in Europe and over overseas.
